Introduction to MAPAS and MyMAPAS

MAPAS is a one-stop interactive mapping and data application tool aimed to make relevant local, state, and federal information more readily accessible to foundations, nonprofit groups, government, media groups and citizens at large. MAPAS provides a platform for achieving greater access and dissemination of information but more importantly, it is a tool that facilitates dialog around relevant community issues and opportunities for organizations across sectors to solve them. MAPAS is currently funded by private foundations and other partners. Through the generosity of these funding bodies, we are able to offer this for your use at no charge. However, our funding partners require us to assess the effectiveness of its content and use. To do this and to also provide you with access to enhanced features such as MyMAPAS (to see a list of available features in MyMAPAS and other enhanced features please [go here](http://open.cridata.org/Mapas/MyMapas/WhatsNew.html) link to: <http://open.cridata.org/Mapas/MyMapas/WhatsNew.html>), we are asking you to create an account and provide us with information about your organization, how you intend to use this tool and data and that you provide us periodic feedback on the effectiveness of this tool. MAPAS will store your information and will not share your data without your permission. This information will be used strictly to allow us to improve the overall performance, usability, and effectiveness of this tool.
